

BioChela Search

BioChela Search contains a blend of selected non pathogenic bacteria and enzymes specially selected for their ability to grow and produce a wide range of enzymes which help degrade organic waste materials. Non acid and no alkaline.

BioChela Search also contains a blend of surfactants to enhance the cleaning effect of the product and to penetrate into deposits on surface. This also aids the microbial action by making a greater area for microbial attack.

BioChela Search also contains natural ingredients to help dissolve lime-scale and uric acid crystals thus preventing significant build up. This helps to eliminate the need for the use of corrosive acids or soda based products for this purpose.

BioChela Search will liquefy waste and eliminate unpleasant odour. It will promote clear, clean drains.

Benefits

- Unique liquid biological formulation replaces environmentally hazardous cleaners.
- Replaces other cleaners, which would previously cause the biological sewage system to malfunction.
- Multi-Purpose use, cleans toilets, baths, sinks, tiles, floors and showers etc.
- Keeps drains, traps and pipelines clean and clear
- Digests grease, body fats, solid organic waste and effluent.
- Destroys obnoxious odours from drains and waste pipes.
- Products requires no hazchem labelling and is therefore safe in use, storage and transport.
- Completely biodegradable thereby minimising any environmental impact.

Areas of Use

All aspects of the formulation help to remove organic materials and prevent build up of deposits which can lead to malodour in toilets and urinals. The chemical ingredients of the product are biodegradable so will not have an adverse effect on the operation of effluent treatment plants and septic tanks.

Other areas of application include slow moving drains, which block with organic matter causing malodours. Excel attacks the organic substrate responsible for these foul odours.

Applications and Method of Use

TOILETS:

Use daily as a normal toilet cleaner. Lift seat and apply BIOCHELA SEARCH to cover the surface of the toilet bowl. Scrub with a toilet brush and leave until toilet is used.

URINALS:

Use daily. Apply liquid to cover the surface. Scrub using toilet brush and leave on surface for as long as possible.

FLOOR AND TILED SURFACES:

Dilute 20:1 and wipe over with a cloth or mop.

Shake well before use

Tanks initial cleaning: Pour about 60ml in the tank and add a little quantity of water.

Regular Treatment: Pour in the tank about 30ml for 20L of water.

Dilution

It is best to use the diluted product within a few hours but the product remains usable for 2-3 days.

CHARACTERISTICS

Appearance	:	Blue Liquid
Odour	:	Lemon
Specific Gravity	:	1.04
pH	:	6.5-7.5

Note:

The use of toxic cleaners such as acids, caustics, bleachers, etc., will have a detrimental effect on the biological activity and should not be used.

STORAGE AND HANDLING:

Do not over freeze.

Store in a cool, dry place.

Avoid prolonged exposure to temperature exceeding 40°C.

Avoid eye contact.

Wash hand thoroughly with warm soapy water after handling.
